Overview

The Smart Solar Sensor Tracking Bracket System enhances solar panel efficiency by automatically adjusting angles based on sunlight intensity. Equipped with intelligent sensors, it optimizes energy capture throughout the day. 4-in-1 SOLAR POWER SYSTEM- The integrated solar panel, lithium battery, solar charge controller, and bracket provide a simple and efficient power solution for security cameras and IoT devices. High Capacity Battery- The 444Wh lithium battery provides up to 72 hours of power for connected devices. Intelligent tracking, increase efficiency by 40% High-precision light sensor monitors the light intensity in real time and intelligently adjusts the angle of the solar panel, which improves the power generation efficiency by 40% compared with the ordinary bracket. Ideal for residential, commercial, and industrial solar installations. The inverter contains voltage, resistance, temperature sensors and current, which can detect the operation of the core and the outside world at any time; there is also a power switch, which can convert the DC generated by the solar panel into AC; the inverter also has the function of two-way. Solar photovoltaic brackets are essential components in solar energy systems.

Solar power monitoring integrated bracket

ECO-WORTHY Dual Axis Solar Panel Tracking System

The internal clamps for this system are specialized aluminum extrusions that work in tandem with square U-bolts to secure the solar panels to the horizontal rails.

- High energy density and long cycle life
- Modular structure

- No need to replace the battery
- Shorter charging time
- Meets 99% EV car

Solar Panel Mounts

Secure your solar panels with durable, easy-to-install solar panel mounts. Designed for stability and optimal positioning, these mounts ensure your solar panels are angled for maximum sunlight exposure.
