Overview

Higher wattage allows for greater light output, but it also places heavier demand on the battery and charging system. If the panel cannot recharge the battery fully, or if the battery capacity is too small, higher wattage lights may dim early, reduce output overnight, or shut off. To choose the best solar street light, consider lumens per watt efficiency, battery capacity, solar panel quality, and installation environment. High-lumen LED chips, monocrystalline solar panels, MPPT charge controllers, and durable materials ensure long-lasting performance.
