

Solar support profile cross-sectional dimensions

Overview

Dimensions: 80mm (H) × 40mm (B) × 20mm (C) × 2. Applications: Low-load rooftop PV arrays (e. Use: Medium-span carport structures (5–6m spans) or high-wind regions (e., Gulf. Download the file to view detailed information. C shape is used as purlin and belt in steel structures, it also acts as load-bearing column and beams in lighter, non-industrial systems. Our roll form machinery can do solar panel support profiles, U Profile, C Profile and additionally support profiles for PVC windows and doors. The constant rise in the price of electric energy together with the decrease in the prices of the elements that comprise a photovoltaic installation is generating a direct increase in the. W Profiles are frequently preferred in many structural projects with their such features as durability and lightness. Thanks to our years of experience and R&D studies, we assist.

Solar support profile cross-sectional dimensions

Structures and support profiles for photovoltaic modules

Circutor offers a complete range of configurable support structures for any type of installation and roof. The pre-assembled triangle is the main element to create the supports with overhang or flat roof. It is ...
