

# South African energy storage lithium battery design

IP65/IP55 OUTDOOR CABINET

ALUMINUM

OUTDOOR ENERGY STORAGE CABINET

OUTDOOR MODULE CABINET

## Overview

---

With South Africa moving toward a more decentralised and decarbonised energy system, battery energy storage systems (BESSes), particularly those using lithium-ion technology, are emerging as one of the most critical enablers of this new era. " Storage is central. Utility-scale battery storage could be one pillar to provide additional grid stability by helping to meet peak demand, help integrate variable renewables, and, especially for industrial consumers, provide continuous electricity during load shedding and outages. South Africa is searching for solutions to achieve economic growth and a sustainable future writes Tshwanelo Rakaibe, Senior Researcher: Energy Centre. Eskom is now searching for solutions for demand management and it has started procuring battery energy-storage systems (BESS). It has awarded contracts to two suppliers (a South Korean company called Hyosung Heavy Industries and a Chinese company named Pinggao Group). Let's face it - our national grid's been on life support for years. In 2023 alone: Wait, no - those solar figures might actually be higher. As of 2025, over 600 million Africans still lack reliable electricity access (IEA, 2025), creating an urgent need for scalable, sustainable energy solutions. At LondianESS, with over a decade of.
