

South America container battery energy storage project

Overview

CATL debuted its 9 MWh TENER Stack at Smarter E South America 2025, the world's first stackable, containerized energy storage system offering 45% less land use, 50% more energy density and five years of zero degradation. Image: Greenergy Spanish independent power producer (IPP) Greenergy has secured a 1. The plant in María Elena commune, in Chile. South America is the continent most dependent on renewable energy, but it is a market that has been difficult for the energy storage industry to penetrate - most South American countries have no storage regulations and offer few incentives, but Chile is leading the way. Given that South America is rapidly adopting energy storage solutions to support renewable energy integration and grid stability. This article explores major projects, regional trends, and how innovations like battery storage systems are reshaping the continent's energy landscape.
