

# Specifications for materials used in photovoltaic fixed brackets

## Overview

---

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. Because of their self-weight, they can only be placed and capacity, and adaptability to complex terrains. The related products of the solar support system are made of carbon steel, choice for both residential and commercial solar panel systems: concrete brackets, steel brackets and aluminum alloy brackets. After the contract award, the

## Specifications for materials used in photovoltaic fixed brackets

---

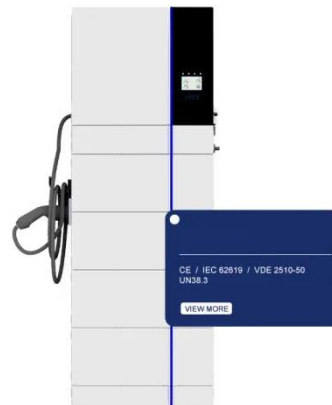

### Basic specifications for photovoltaic power generation brackets

ensuring the longevity and performance of a solar panel system. Solar panel brackets are an important part of the installation process and should be installed by a professional. The brackets must be ...
