

# Specifications of Heishan Double Glass solar Modules

## Overview

---

Measurements according to IEC 60904-3, Measurement tolerance: ISC:  $\pm 4\%$ , VOC:  $\pm 3\%$ , Test uncertainty for Pmax:  $\pm 3\%$ , Bifaciality:  $80\% \pm 5\%$  STC (Standard Test Condition): Radiation 1000 W/m<sup>2</sup>, Module temperature 25°C, AM = 1.5. High durability, suitable for various climates, offering extended lifespan and excellent energy yields. Why Choose Double Glass Solar Modules?

Glass-glass solar modules (bifacial modules) increase energy production by approximately 2% to 5% compared to traditional glass-backsheet modules, thanks to. easurement . No-Busbar(OBB) Technology, shorten 40% of the transmission distance. Reduces losses & improving conversion efficiency TOPCon cells, lower attenuation, better temperature coefficient & dim light performance TOPCon cells double-sided rate up to 85% and more back power generation by 5-25% Double-glass. Glass-glass PV modules, also known as double glass solar panels, are photovoltaic modules encapsulated with tempered glass on both the front and back sides. The dual-glass structure provides. 100% green production, transparent supply chain and excellent ESG rating in the solar industry. Increased energy yield due to optimized material use. Protection against harsh environmental conditions certified by TÜV Rheinland.

## Specifications of Heishan Double Glass solar Modules

---

### Double glass solar module , Maysun Solar

Compared to traditional single glass modules, double glass modules offer significant advantages, particularly in terms of efficiency and durability. The rear glass layer can absorb reflected light, ...

## Glass-Glass Solar Panel Technology

Glass-glass module structures (Glass Glass or Double Glass) is a technology that uses a glass layer on the back of the modules instead of the traditional polymer backsheet.
