

# Specifications of hexagonal screws for photovoltaic brackets

## Overview

---

Let's demystify three common specifications: the M8x80 Hex Head for the US, the 6. Understanding these differences is key to ensuring compatibility, efficiency, and satisfaction in your globalsolar projects. We are a R&D, manufacturer of solar mounting system with more than 20 years of experience, with professional technology, production and customer service team. If you have engineering project needs, we can customize the solar mounting system solution for you according to your project location. Mounting Brackets are the primary components that attach the solar panels to the mounting surface. They provide a stable base. Ensure maximum reliability in your photovoltaic panel installation: choose our specialised screws and bolts, made of stainless and galvanised steel, tested with thousands of solar power systems in Italy and Europe, according to the highest industry standards. Our photovoltaic bolts are built to. High Weather Resistance: They need to be exposed outdoors for a long time, withstanding extreme environments such as ultraviolet rays, rain, salt spray, and high/low temperatures (-40°C~80°C). Vibration and Wind Load Resistance: Photovoltaic modules may vibrate or displace due to wind, snow, etc. M8 Solar Panel Rack Stainless Steel Hex Bolts Have a Hexagonal Head Used With a Wrench or a Socket. Made of A2 Grade Stainless.

## Specifications of hexagonal screws for photovoltaic brackets

### High Quality Stainless Steel Hexagonal Bolts and Screws for Solar

We have our own factory with an area of 150,000 square meters, producing a full range of solar photovoltaic products. For both sample orders and large orders, we can guarantee timely delivery.
