

# Square tube steel for photovoltaic support

## Overview

---

As a key steel material for photovoltaic bracket systems, square tubes are becoming the supporting materials for various photovoltaic projects with their superior mechanical properties, strong processing adaptability and anti-corrosion capabilities. This article will analyze the application advantages, structural. Slitting is a precision cutting process that transforms wide coils of steel into narrower strips. Looking to Source Tubular Products for Your Solar Project?

Zekelman is your go-to source for steel tubing that supports your solar applications. Torque tubes are typically circular, square, pentagonal, octagonal, or D in shape and coated with galvanizing.
