

Standard quotation for 52 photovoltaic panels

Overview

As of 2026, the average cost of residential solar panels in the U. This typically translates to about \$2. 50 per watt of installed capacity (more on price per watt below). Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Solar panels cost \$3. 75 per watt before factoring in available solar incentives.
