quad-core processors  
smooth and stable system

## Overview

---

I made a Breeze powered ender pearl cannon and a bulk breeze wind charge generator for Minecraft 1. Fixed some of the flaws of the previous machine and this one is much faster to start up and shut down. However, it does not have a counter module attached to it like V2 does, but it shouldn't be too difficult to add on. early to mid game - wind generators from mekanism, you can set them up at max height and use tesseract to teleport the power to your base mid to late game - reactor (nitro). From here you can search for some of these power generators, see how to make them and start connecting them together. It generates power of up to 480 J/t (192 RF/t) and can store up to 200 kJ (80 kRF), with a maximal output of 960 J/t (384 RF/t).

### Mekanism Early Game Power Generation , Jangro

Universal CablesHeat GeneratorSolar GeneratorAdvanced Solar GeneratorWind GeneratorWhat About Batteries and Capacitors?Wind generators will produce decent power, and more of it with higher altitudes. Most importantly, they work in the dark! My wind generator here is producing 64 FE/t at Y level 74. You could spend a lot on basic universal cables to get it up very high, and depending on how well your solar generators do where you live, this may be more or less cost- See more on [jangro mcmod.wiki](http://jangro.mcmod.wiki)
