

# State-owned enterprise photovoltaic panel testing

## Overview

---

This test measures how well a solar panel works under different light levels (irradiance) and temperatures. It helps determine how much power (in watts) the panel can produce in various real-world conditions. The goal is to create a standard way to test and rate the performance of. Rely on our full-service testing, inspection and certification services for solar energy to support your products in the renewable energy market. Rely on our global network of expertise and experience to guide you through every step of the testing and certification process. We help you streamline efforts and create efficiencies to get your product to. is a leading environmental chambers and solar photovoltaic testing chambers manufacturer in China.

## State-owned enterprise photovoltaic panel testing

---

### Photovoltaic Product Testing & Certification , CSA Group

We test and certify PV racking and tracking systems--full or component certification--to comply with national and international standards, including ANSI/UL, CAN/CSA, and IEC.
