

# **Status of Datang Power s wind power projects put into operation and connected to the grid**

## Overview

---

On Octo, the Datang Baxoi Wind Power Project, the world's highest wind farm at an altitude of 5,200 meters in southwest China's Xizang Autonomous Region, was fully connected to China's state grid. Remaining committed to the development of new energy, China Datang has contributed significantly to the building of a new energy. China on Wednesday completed the installation of all wind turbines of its Datang Basu Wind Power Project, currently the world's highest altitude wind power project. In a six-month endeavor, the project saw the full installation of 20 wind turbines, marking the commencement of the final equipment. One site of Datang CZ3 project has a planned installed capacity of 600,000 kilowatts, and according to the current progress, we are confident that we can achieve the goal of producing electricity by the end of this year. 2 million-kilowatt offshore wind power project in Danzhou, Hainan, a key energy project in the province, which is being constructed by the General Contracting Branch of CCCC First Harbor Engineering Company Ltd.
