

# Steel structure factory building solar roof integrated panel

## Overview

---

Homeowners and building owners often wonder if it's feasible to install solar panels on a metal roof. Why SunSteel™ for Your Next Roof?

One system. Metal panels, often used as roofing material. Designing a metal building with solar energy in mind requires more than adding panels later. It involves careful planning and structural considerations that influence its layout. Solar technology continues to improve, becoming more affordable and accessible.
