

Supplier of bidirectional charging for subway station integrated energy storage cabinet

Overview

Onsemi introduced nine new EliteSiC Power Integrated Modules (PIMs) focused on enabling bidirectional charging for DC ultra-fast EV chargers and energy storage systems. Equipped with this technology, EVs can not only draw power from the grid but also return electricity to it, or supply power to homes during peak demand or in the event of blackouts. This breakthrough opens up new. As a leading supplier in the field of renewable energy, I'm excited to share insights about our Bidirectional EV Charging Station. Designed to meet the growing demand for electric vehicle infrastructure, this innovative solution allows not just vehicle charging, but also energy storage and return. Our cutting-edge products, ranging from smart inverters to integrated energy storage, are tailored to empower homes, businesses, and industries with reliable and eco-friendly energy management. Meanwhile, lower-cost alternatives to lithium, such as sodium-sulphur, are also being developed. What is BESS?

Battery Energy Storage Systems (BESS) are systems.
