Overview

The law of supply and demand predicts that if the supply of goods or services outstrips demand, prices will fall. Conversely, if prices fall, suppliers typically provide less. An increase in price almost always leads to an increase in the quantity supplied of that good. The law of supply states that the quantity of a good supplied (i. 8 million + professionals use CFI to learn accounting, financial analysis, modeling and more. 75 a pound, while its conventional counterpart costs \$1. 72 a pound?

The same price relationship is true for just about every organic product on the market.

Law of supply

The law of supply is a fundamental principle of economic theory which states that, keeping other factors constant, an increase in price results in an increase in quantity supplied. In other words, there is a direct relationship between price and quantity: quantities respond in the same direction as price changes. This means that producers and manufacturers are willing to offer more of a product for sale on the market at higher prices, as increasing production is a way of increasing profits.
