

# Tajikistan pool solar power home

To Strive forward No Energy Waste

- ✓ All in one
- ✓ 100~215kWh High-capacity
- ✓ Intelligent Integration

## Overview

---

On March 29 this year, the head of the Committee for Architecture and Construction, Nizom Mirzozoda, issued a new order, under which, starting on April 1, all new and renovated buildings must be equipped with solar energy systems capable of storing at least one day's worth. On March 29 this year, the head of the Committee for Architecture and Construction, Nizom Mirzozoda, issued a new order, under which, starting on April 1, all new and renovated buildings must be equipped with solar energy systems capable of storing at least one day's worth. Tajik President Emomali Rahmon has ordered the installation of solar panels in the country's homes. This issue was discussed at a government meeting where the electricity sector development program for 2026–2030 was discussed, according to the presidential press service. According to the program, Tajikistan is embarking on a transformative energy initiative, planning to significantly increase its electricity capacity by 2030. The country has set an ambitious goal to add 3,000 megawatts (MW) of solar and wind power, a move that will not only dramatically boost its renewable energy production. Discover how Tajikistan's solar energy projects are reshaping its renewable energy landscape. Explore opportunities, challenges, and innovative solutions for solar power plant development in Central Asia. With over 280 sunny days annually and average solar radiation of 5.
