

# Tallinn New Energy Storage Enterprise

## Overview

---

The €100M facility, built by Estonian company Evecon alongside French partners Corsica Sole and Mirova, features 54 battery containers and represents continental Europe's largest battery storage complex. As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery viability in northern climates. Operational since Q4 2024, this 240 MWh lithium-ion system supports Estonia's ambitious plan to derive 50% of its electricity from wind. Tallinn, Estonia's tech-savvy capital, has become a hotspot for new energy storage scale enterprises aiming to solve renewable energy's biggest challenge: inconsistency. An international tender has been announced to find a suitable building in Tallinn. First, our results demonstrate that for a merchant with co-located energy storage facility in Tallinn with high electricity consumption. Who Cares About Energy Storage in Tallinn?

. city of 200 megawatts energy storage project from utility Ee industrial ecosystem & its main objectives. o be fed into the grid in a controlled manner. O&#220; y"'s largest bat olutions, especiall e ornerstone fo al parks are distributed throughout the world. They concentrate on intensive.
