

# Tariffs on photovoltaic panels

## Overview

---

The countervailing and anti-dumping duties are in addition to existing section 201 solar tariffs that are currently 14%, but are scheduled to end on Febru, and to "reciprocal" tariffs that took effect on Apat a 10% rate and are scheduled to increase to 46%. The countervailing and anti-dumping duties are in addition to existing section 201 solar tariffs that are currently 14%, but are scheduled to end on Febru, and to "reciprocal" tariffs that took effect on Apat a 10% rate and are scheduled to increase to 46%. The One Big Beautiful Bill (OBBB), together with proposed tariffs on foreign components and systems, is reshaping incentives, investment flows, and supply chains across both technologies. While these measures are designed to strengthen domestic manufacturing and reduce exposure to foreign entities. On Janu, USTR announced that the President had approved recommendations to provide relief to U. International. The cost of going solar is likely to increase this year as even higher tariffs are enacted. Tariffs have had a net negative impact on the U. solar industry and environment by slowing deployment. A tariff or duty is a tax. The US Commerce Department set final countervailing and anti-dumping duty rates on Monday for crystalline solar cells and modules imported from four southeast Asian countries. Cells and modules from Vietnam, Malaysia, Thailand and Cambodia are affected.
