

# The current status of hybrid energy for communication base stations in Saint Kitts and Nevis

## Overview

---

Discover how hybrid energy systems, combining solar, wind, and battery storage, are transforming telecom base station power, reducing costs, and boosting sustainability. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas. Kitts (MoPIEUDT News) - There is an ecosystem of energy resources and policies that operate to guide how an ordinary citizen interacts with multiple forms of energy in daily life. Since taking office as the Minister of Energy in August 2022, the Hon. Konris Maynard articulated clear. St. ' The project, dubbed 'SKN-100,' aims to hasten the country's shift to 100 percent renewable electricity and 100 percent high energy. Accelerate the transition towards 100% renewable electricity generation and 100% high energy efficiency public buildings in Saint Kitts and Nevis. Historically dependent on fossil fuels, the country is now aligning its energy strategy with the United Nations Sustainable Development Goals. As the Minister responsible for energy, I would like to reiterate my commitment to ensuring that the citizens of the Federation have access to clean, secure, and affordable energy.
