

# The first batch of new energy storage pilot projects

CE UN38.3 

## Overview

---

Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED) issued a Notice of Intent (NOI) for up to \$100 million to fund pilot-scale energy storage demonstration projects, focusing on non-lithium technologies, long-duration (10+ hour discharge). Today, the U. Technology Developers, Industry, State and Local Governments, Tribal Organizations, Community Based Organizations, National Laboratories. The National Energy Administration released the first batch of pilot hydrogen energy projects in the energy sector, with the Daye Deep Underground Hydrogen Energy Storage System pilot project being selected. There are many solutions under investigation within the research and development (R&D) community across electrochemical, mechanical, and thermal approaches. At the beginning of this year, the NEA has released a list of 56. sly discharge to the grid for 100 hours. The 5 MW / 500 MWh iron-air battery storage is the largest long-duration energy storage project to be built in Cal ergy storage technologies," Hunter said. SRP"s RFP det ils can be found on the company"s site.

## The first batch of new energy storage pilot projects

---

### ENERGY STORAGE PILOT DEMONSTRATIONS

Build investor, utility, and other end user confidence in the real performance and adoptability of the proposed solutions. This program will fund technology demonstrations for energy storage solutions at ...
