

# The first microgrid company

## Overview

---

Do you think the concept of a microgrid is new?

It turns out, it is not. It combined heat and power and produced electricity and thermal energy. A microgrid is a mini-version of the electric grid, which fits the “micro” notion, but the origins of the word have been lost in history. According to Pike Research, the first “modern industrial microgrid in the United States was a 64 MW facility constructed in 1955 at the Whitling Refinery in. The Battery and Control Room in the first Edison Electric Lighting Station at Pearl Street in lower Manhattan in 1882. By Everett Historical/Shutterstock.
