

The latest BESS solar energy storage station

Overview

Loom Solar has announced the launch of its scalable 125kW / 261kWh CAML Battery Energy Storage System (BESS), expandable up to 1 MWh, designed to provide uninterrupted power for commercial and industrial users and reduce losses caused by grid outages. In 2025, utility-scale battery storage is projected to expand by a record 18. These systems play a crucial role in balancing supply and demand, enhancing grid stability, and supporting the integration of renewable energy. The BESS is scalable up to 1 MWh. Find opportunities for new investment, identify new counterparties, and access new information that can be input into models or verify data from other sources.
