

The role of containerized substation in Guyana

Overview

The substation plays a key role in the GtE transmission network and will receive 230kV of power from the GtE plant, which will be stepped down to 69 kilovolts (kV) using two 375 megavolt-ampere (MVA) transformers—each weighing 241 tons. The Stirling engine is an external combustion engine with four internal closed cycles. The generator is connected to the crankshaft of the Stirling engine to achieve. GUYANA POWER & LIGHT INC. Minister within the Ministry of Public Works, Deodat Indar, on April 3 inspected the Goedverwagting facility. Minister in the Ministry of Public Works, Deodat Indar yesterday inspected the ongoing construction of the Goedverwagting substation that will transmit power from the gas to energy project to consumers.
