

The wind turbine was blown crooked by the wind

Overview

Vineyard Wind, the nation's first large-scale offshore wind farm, was shut down by the federal government on Tuesday after a turbine blade failure sent thousands of pieces of debris into the ocean and onto the beaches along Nantucket's south shore. Nantucket Current has confirmed this photo of the broken turbine approximately 15 miles off the southwest coast of the island. The collapse was so massive that it caused nearby houses to shake. 25 report by Kent Kroyer in Ingeniøren, "large, sharp pieces of fiberglass from the blade rained down over the. A wind turbine has collapsed during windy weather in Victoria, sparking concern in the local community and calls for an urgent safety audit. The top half of the 112metre-tall turbine at Berrybank Wind Farm, west of Geelong, snapped off in the early hours of Tuesday morning after wind gusts of. NOAA's Office of Response and Restoration (OR&R) provided important information to aid in tracking the path of wind turbine blade parts after the offshore wind energy company, Vineyard Wind, noticed a broken blade on one of its wind turbines offshore of Martha's Vineyard on July 13. These failures can lead to significant downtime, reduced energy output, and increased maintenance costs.
