

# Togo s largest energy storage battery company

## Overview

---

By adding a 55 MW battery system, Togo can store the excess energy generated by the Blitta plant during the day and dispatch it during evening peak hours or periods of low solar generation. This approach directly addresses energy security and reliability. (Togo First) - Togo is set to pilot a green energy storage program after the French Development Agency and the Global Energy Alliance for People and Planet (GEAPP) signed an agreement for 112 million CFA francs (\$200,000) to finance feasibility studies. The announcement was made on the sidelines of. Togo is taking a significant leap forward in its energy transition by launching a 55 MW pilot project for battery storage. China's TBEA International Engineering is leading the project, which is scheduled for completion within 13 months. The 120MWh lithium-ion system. A solar PV plant with a battery energy storage system in Togo is set to expand its capacity to provide electricity to thousands more households.
