

Trina 330 photovoltaic panel size

Overview

The TrinaSolar 330 is a solar panel with a 330W capacity and a maximum efficiency of 19. Another advantage is the half-cut cell technology. TSM 330 has solar cells half the size of those installed in conventional panels. Founded in 1997, Trina. See the table below for available information we have about Trina Solar Co Ltd TSM-330PD14 solar panels. Power (measured in watts) and efficiency (how well panels convert sunlight to electricity) are some of the most common metrics used to compare solar panel products. Excellent 3rd party validated IAM and low light performance with cell process and module material optimization PERFORMANCE WARRANTY From the 2nd year to the 25th year, the average annual power decline will be no more than 0. STC: Irradiance 1000W/m², Cell Temperature 25°C, Air Mass AM1.
