

Trinity photovoltaic panels can be used as roofs

Overview

These panels can be installed on rooftops or in open spaces, depending on the available area and energy needs. If you have solar panels and think you might need a new roof, here are 5 things to keep in mind. The age of your roof can be a good indicator that you need a new one, but you can also. Trinity Solar has been in business for 30 years, and it's one of the largest privately-owned solar installation companies in the country. It uses generally high-quality products and offers customers some flexible payment options. But many homeowners on the fence still ask: Is it worth the investment?

To know the answer, you need to consider the long-term savings, increased property value, and the step. Using solar panels as a roof blends energy generation with protective roofing, offering aesthetic and functional benefits compared to traditional rooftop systems.
