

# Tunisia energy efficiency

## Overview

---

Collectively, the new wind and solar projects are expected to save Tunisia hundreds of millions of dollars by reducing gas imports, while lowering carbon emissions, improving energy security and creating thousands of jobs during construction and operation—marking a significant. Collectively, the new wind and solar projects are expected to save Tunisia hundreds of millions of dollars by reducing gas imports, while lowering carbon emissions, improving energy security and creating thousands of jobs during construction and operation—marking a significant. TUNIS, Novem— The World Bank and the Government of Tunisia have concluded a financing agreement to support Tunisia's energy sector modernization agenda through the Tunisia Energy Reliability, Efficiency, and Governance Improvement Program (TEREG). This five-year program of US\$430. Tunisia needs more than solar and wind energy to achieve sustainable full energy self-sufficiency. Tunisia is embarking on an ambitious long-term clean energy transition, anchored in the rapid development of solar and wind projects. State power utility company. The energy sector is by far the largest source of Green House Gas (GHG) emissions in Tunisia, accounting for 58% of the country's total GHG emissions ( $\approx 27$  MtCO<sub>2</sub>e/2012), and based on the NDC reports, expects to reach 47. Energy use related to buildings (including lighting) accounts. Tunisia has advanced its energy transition agenda with the award of new renewable energy concessions to major international developers, as part of its 1,700MW renewable energy tender programme aimed at reducing reliance on imported natural gas and increasing the share of renewables in its power mix.
