

# US photovoltaic container grid-connected type manufacturer

## Overview

---

The Mobil-Grid ® is an ISO-standard, CSC-approved maritime container that integrates a photovoltaic power plant, ready to be deployed and connected, with integrated control cell and batteries. As energy challenges grow, our solar container solution was created to meet the need. The container is equipped with foldable high-efficiency solar panels, holding 168-336 panels that deliver 50-168 kWp of power. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. Whether it's a single microgrid for a remote facility or a portfolio of systems across multiple sites, our solutions are. CEEG takes product leadership, technology leadership, and cost efficiency leadership as its development strategy, and is committed to meeting the real needs of customers and creating more economic value in household/ industrial and commercial/grid-side energy storage. The Mobil-Grid ® is the ideal.
