Overview

The 100 MWp solar photovoltaic (PV) power plant integrated with a 250 MWh battery energy storage system (BESS) project will be delivered by U. -based Energy America, and its regional subsidiary EA Astrovolt will serve as lead developer and execution partner. A major solar-plus-storage has been approved by the Government of Uganda, with the project set for Kapeeka Sub-County, Nakaseke District, approximately 62 kilometers northwest of. Located in Kapeeka, Nakaseke District, the plant will be equipped with technology designed for tropical and equatorial climates. Image: Raze Solar via Unsplash. This ambitious project is designed to strengthen grid stability and accelerate the country's transition to renewable energy. The facility, to be built in Kapeeka, marks the first phase of.
