

What are the specifications of the 345W dual-wave solar panels

Overview

The 345W solar panels have a rated output of 345 Wp and an impressive efficiency of 19. Homeowners can also pair these panels with energy storage solutions, such as home batteries, to store excess energy for use during peak hours or in case of power outages. High-tech aluminium alloy frame, certified for high snow (6000 Pa) and wind loads (4000 Pa). Inclusive 25-year product. LG NeON® 2 modules use a highly efficient bifacial solar cell, “NeON” applied Cello technology for better energy production than standard monofacial PV module. The rear of the cell used in the LG NeON® 2 Black contributes to generation, just like the front; the light beam reflected from the rear of. To compare updated solar panel prices by brand, system size, and more, check out our article on the cost of solar. Power (measured in watts) and efficiency (how well panels convert sunlight to electricity) are some of the most common metrics used to compare solar panel products.
