

# What does MW mean for photovoltaic panels

## Overview

---

In solar energy, 1 MW refers to the maximum potential output of a solar installation under ideal conditions. When someone says they have a 1 MW solar plant, it means that under peak sunlight, that plant can produce 1 MW of power at a given moment. Kilowatt (kW): How we measure the size of a home solar panel system. A kilowatt is just 1,000 watts. Megawatt (MW): Some commercial solar projects. What is a Megawatt (MW)?

A Megawatt (MW) is a unit of power equal to one million watts (1,000,000 watts). Scripps School of Journalism at Ohio University in Athens, Ohio. She is a member of Kappa Tau Alpha - a national honor society of journalism. In practical terms: You might think installing.
