

# What is container energy storage used for

## ESS

## Overview

---

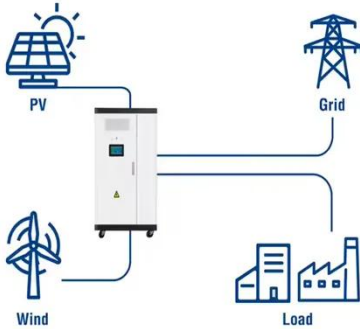

It serves as a rechargeable battery system capable of storing large amounts of energy generated from renewable sources like wind or solar power, as well as from the grid during low-demand periods. When needed, this stored energy can be discharged to provide a dependable electricity. What is a Containerized Energy Storage System?

A containerized BESS is a fully integrated, self-contained energy storage solution housed within a standard shipping container. A BESS stores energy in batteries for later use. This setup offers a modular and scalable solution to energy storage.
