

# What kind of battery is the solar power lamp

## Overview

---

Since solar lights use rechargeable batteries and most standard-use batteries are designed to be rechargeable, there isn't a difference between the two. They provide illumination throughout the night, less money chucked at your utility bill, and, of course, eco-friendliness. But there's not one but many variants of solar.

## What kind of battery is the solar power lamp

---

### What is the battery for solar light bulbs? , NenPower
