

# What to do if the photovoltaic panels are demolished

## Overview

---

Yes, local, state, and federal regulations can dictate how demolished solar panels are handled, including requirements for recycling or disposal due to environmental laws. Homeowner's insurance may cover personal property loss, including solar. When solar panels, which typically have a lifespan of more than 25 years, reach the end of their lives and become a waste stream, they must be managed safely. The good news?

You may still have a strong legal case. This comprehensive process includes dismantling equipment such as racking systems, wiring, inverters, transformers, and foundations. Skid steers are used to collect large quantities of panels that are stacked in uniform for removal. Upon completion of the economic life of a project or, potentially permit expiration, the project owner will determine to apply for a new.
