

What type of photovoltaic panels is best

Overview

Compare monocrystalline, polycrystalline, and thin-film solar panels. Learn efficiency, cost, and performance differences to choose the best panels for your home in 2025. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best. Out of the three types of solar panels, monocrystalline are the most efficient, polycrystalline are the cheapest, and thin-film panels are the most portable. Why trust EnergySage?

The type of solar panel you need depends on the type of system you want to install. When deciding, consider factors like your budget, roof size, sun exposure, and energy efficiency goals.
