# Where is the closest communication base station to wind power in the United States

Overview

A dynamic web application for accessing U. wind turbine locations, corresponding facility information, and turbine technical specifications. Offering more than 300 wind resource maps and counting, the U. Department of Energy Wind Energy Technologies Office's WINDExchange website serves as a hub of wind data for large and small wind energy projects alike, including those offshore. The comprehensive (and colorful) collection of wind. Your browser may have performance or functionality issues with Open Infrastructure Map. Wind Turbine Database (USWTDB) Viewer lets you visualize, inspect, interact, and download the most current onshore and offshore turbine locations in. Read the Coverage Map Notes below to understand these factors on the state and individual maps. The coverage statistics and maps are calculated using a computer model and station data, assuming ideal conditions. CellMapper is a crowd-sourced cellular tower and coverage mapping service.
