

Which telecommunications company in Africa has the most base stations

Overview

To date, Telecom Egypt owns and operates 10 in service subsea landing stations which are connected over 10 diversified terrestrial crossing routes of a total length of 5,300km. By mid-2025, ten major telecom companies are set to lead the continent's connectivity and digital transformation across diverse markets. These companies are ranked considering various factors such as subscriber base, revenue, market capitalization, and geographic presence. Globacom Limited Founded in 2003, Globacom is currently considered one of Nigeria's largest telecommunication firms and is a member of Nigeria's Big Four - together with MTN Nigeria, Airtel Nigeria, and 9Mobile. Nigeria's second largest mobile operator, Glo made history as the first single company to build a high-capacity submarine fibre-optic cable, known as Glo-1. It continues to be one of the three major telecommunications companies in Egypt, along with Vodafone Egypt and Etisalat Misr, and it operates under the Orange brand name. A lack of fixed telecommunications infrastructure in many African nations, combined with a range of local socio-economic factors, have made mobile access paramount for. The African mobile telecommunications industry has witnessed significant growth in recent years, with millions of people across the continent relying on mobile networks for communication and connectivity.
