

# Which wire is better to use to connect photovoltaic panels

*LiFePO<sub>4</sub> Battery, safety*

*Wide temperature: -20~55°C*

*Modular design, easy to expand*

*Wall-Mounted&Floor-Mounted*

*Intelligent BMS*

*Cycle Life: ≥ 6000*

*Warranty: 10 years*

## Overview

---

- PV Wire, USE-2 and RHW-2 cables are used for connecting solar panels together. They are UV and moisture resistant. It's wise to choose photovoltaic wiring that can withstand long periods of sunlight, moisture, and temperature changes. But will THHN wire hold up well when faced with harsh environmental conditions?

In this guide, you'll find out! We'll dive into the details of each wire type to help you make the. When installing solar panels, choosing the right photovoltaic wire type is crucial. However. But when it's time to wire everything together, you hit a wall: Which cable do I actually need, and why does it matter?

Choosing the right solar cable is a critical (and often overlooked) part of building a safe, efficient solar system—whether it's for your home, RV, boat, or cabin.
