

Will photovoltaic panels explode when struck by lightning

Overview

Lightning strikes can damage solar panels directly or indirectly. Surge protection devices like Citel DS72-RS-120 are recommended. Solar installations represent significant investments across residential, commercial, and utility-scale projects. All of us should be careful to consider the probability of solar panels being struck by lightning when installing solar panels to minimize this risk.

Will photovoltaic panels explode when struck by lightning

How to Protect Solar PV Systems from Lightning

Protect Solar PV Systems is crucial for maintaining their functionality and longevity. Lightning poses significant risks, including direct strikes, induced lightning, and ground potential rise, all of which can ...

What Happens If A Solar Panel Gets Struck By Lightning?

When a lightning strike occurs near or directly on a solar panel, the electrical surge that accompanies the strike can severely damage the photovoltaic cells within the panel.
