

Will the coated glass of photovoltaic panels break

SUPPORT REAL-TIME ONLINE
MONITORING OF SYSTEM STATUS

Overview

While a panel might function with a broken glass face, breaks do affect its efficiency. Severe damage can also stop the panel from working altogether. Damaged solar panel glass can lead to reduced sunlight absorption, causing a decrease in overall energy. Modern PV modules often use thinner glass to reduce weight and material costs which lead to glass breakage. Assess the extent of the damage, identify possible causes, and determine repair or replacement needs; 3. Consider insurance claims for coverage, check warranties.
