

Wp What does photovoltaic panel mean

Overview

What is WP?

WP stands for watt peak or peak watt. It is a unit of measurement used to describe the maximum power output of a solar panel under ideal conditions. These conditions include a solar irradiance of 1000 watts per square meter, a cell temperature of 25°C, and an air mass of 1. The way they determine this amount is to take short circuit current and multiply it by open circuit voltage.
