

Xinguang Jujiang Photovoltaic Support

Overview

A one million-kilowatt integrated solar-thermal and photovoltaic comprehensive energy demonstration project has officially connected to the grid for power generation in northwest China's Xinjiang Uygur Autonomous Region. An aerial drone photo taken on Sept. With large-scale investments in wind, solar and cutting-edge. Cutting-edge technology is accelerating the energy transformation in China's Xinjiang, paving the way for a sustainable future and reshaping the resource-rich region into a symbol of green development, guests of the Sixth World Media Summit have said. by Xinhua writer Liu Bowei URUMQI, Oct.
