

Zambia New Energy Storage Sales

Overview

New platforms like ZambEnergy Exchange (ZEE) let producers auction stored energy like eBay for electrons. Last quarter saw 45 GWh traded - enough to brew 9 billion cups of Zambian coffee! Konkola Copper Mines recently installed a 20 MW/80 MWh storage system. Monthly distribution of PV production in Zambia

The German Energy Solutions Initiative, coordinated and financed by the German Federal Ministry for Economic Affairs and Climate Action (BMWK), aims to globalise German and European technologies and expertise in climate-friendly energy solutions. At the C&I Energy+Storage Summit Zambia 2025 in Lusaka, financing renewable energy projects emerged as a central theme, particularly the role of embedded power generation in strengthening energy security and enabling business continuity. This underscores the country's remarkable clean energy credentials. However, a dependence on hydropower presents challenges, particularly during periods of drought, as witnessed in recent years. With rolling blackouts becoming as predictable as rainy season downpours, Zambia's energy storage sector grew 42% faster than the African average last year, according to the latest data from the IEA. The newly inaugurated Choma Solar plant, combining 60 MW of solar capacity with 20 MWh of battery storage, marks a turning point for energy access and reliability in rural areas.
